Ref: Islamic Republic threats to dissidents in the United Kingdom.

Dear Foreign Minister,

According to the Director General of the Security Service, Mr. Ken McCallum, the Islamic Republic's intelligence services have made at least ten attempts to kill or kidnap British nationals in the U.K since January 2022.

The U.K is proud of its Human Rights and free speech. The Islamic Republic is now threatening dissidents with death threats, attempted assassinations, and kidnapping on U.K soil and this cannot be tolerated as it is an attempt to silence the opposition of the regime.

This threat indicates the aggressive and dangerous nature of the Islamic Republic secret service working overseas. This is a state-sponsored activity and it is unacceptable.

The Iranian diaspora welcomed the news that the Foreign Office summoned the Islamic Republic deputy ambassador.

However, the regime in Tehran will not respect or adhere to international norms, they will not be phased by a summoning of an ambassador or his deputy, but will only respond to positive action.

The Association of Iranian Human Rights and Allies, in the interest and protection of free speech, Human Rights as well as negating the risk of an assassination on U.K soil, requests that the U.K government re-examines its relationship with the theocratic dictatorship.

We request that the representatives of the Islamic Republic of Iran should be expelled and that the U.K representatives withdraw from Iran.

We previously contacted your department with concerns regarding the true function of the Islamic centers that have been set up by the Islamic Republic. There are five centers based in the U.K and they have representatives of the Supreme leader of the Islamic Republic within these centers spreading propaganda and support for the failing dictatorship. We request that an investigation into the conduct and activity of these centers are conducted.

We also request that Iranian-registered aircraft should not be permitted to fly into or over U.K airspace.

We sincerely hope that the government reacts with action to these unacceptable threats to the U.K, its residents, and its citizens.

Yours Sincerely

Association of Iranian Human Rights and Allies
